A Child Centered Program

In a Montessori Program, children develop at their own pace, moving from one success to another. They are given freedom of movement and choice within a clearly defined structure. The specially trained teacher, who understands child psychology, the absorbent mind and sensitive periods, maintains a specially prepared environment designed to facilitate the development of the child's independence, critical thinking skills and the sense of personal empowerment.

Our program is geared to meet the needs of each child on an individual basis, with emphasis being placed on the child's uniqueness. A wide range of activities are available for their selection. The freedom they enjoy encourages them to express their creative abilities and develop independence through decision making.

This freedom is experienced within a structured frame work established by the teacher, with limits to provide security for the child and ensure progress in all areas of development. Discipline is established in a firm but loving way, always emphasizing the positive, by using consistency.
